PROFESSIONAL SUMMARY

Data Analyst with a strong foundation in data analysis, statistics, and problem-solving. Experienced in working with Power BI, DAX, Power Query, MS-SQL Server, and Python to build end-to-end data analysis and business intelligence solutions. Comfortable handling large datasets, and creating interactive dashboards for business reporting and decision-making. Skilled at turning raw and complex data into clear insights that help businesses understand performance and make better decisions.

TECHNICAL SKILLS

- **Python & Analytics:** Pandas, NumPy, Matplotlib, Seaborn, EDA, Data Cleaning, Feature Engineering
- **SQL & Databases:** MS-SQL Server, MySQL, Joins, CTEs, Subqueries, Window Functions, Stored Procedures, Indexing.
- **BI & Data Visualization:** Power Query, Data Cleaning & Transformation, Star Schema, DAX, Calculated Measures, What-If Parameters, Drill-Through, KPI Dashboards, Dynamic Visuals. Dataflows, Gateway Configuration, Scheduled Refresh, RLS.
- **Excel & Data Preparation:** Pivot Tables, Power Pivot, Data Modeling, VLOOKUP, XLOOKUP, Conditional Formatting.
- **Business & Analytical Skills:** Churn Analysis, Cohort Analysis, Revenue & Risk Analysis, Process Automation.

KEY DATA ANALYTICS PROJECTS AND EXPERIENCE

Telecom Customer Churn & Revenue Analysis

- **Data Cleaning and Feature engineering:** Processed and cleaned 1M+ customer records using Python.
- **Data Analysis:** Used MS-SQL Server to analyze churn and revenue using joins, CTEs, and aggregations. Identified 26.02% churn (260,158 customers) and analyzed key churn segments.
- **Power BI Dashboard:** Built an interactive churn dashboard with DAX and What-If analysis to estimate revenue impact of a 5% churn reduction.

Sales Performance & Margin Analysis

- **Data Modeling & ETL:** Built a star-schema model and used Power Query for data cleaning and transformation.
- **Sales Analysis:** Analyzed 3,510 orders and 7,130 units to evaluate revenue, profit, and promotional performance.
- **What-If Analysis:** Created DAX parameters to simulate profit at different margin levels, including a 10% margin (\$12.23M) scenario.
- **Product Analysis:** Used drill-through and comparative analysis to identify high- and low-performing products.

PROFESSIONAL CERTIFICATIONS

- **Microsoft Power BI Desktop for Business Intelligence** — *Maven Analytics*
- **Complete Data Analyst Bootcamp: Basics to Advanced (Python, SQL, Analytics)** — *Krish Naik*
- **The Ultimate MySQL Bootcamp: Go from SQL Beginner to Expert** — *Colt Steele*
- **100 Days of Code™: The Complete Python Pro Bootcamp** — *Dr. Angela Yu*
- **Microsoft Excel: Excel from Beginner to Advanced (Formulas, Pivot Tables)** — *Kyle Pew*

EDUCATION & ACADEMIC ACHIEVEMENTS

- **M.Sc. in Biotechnology** — Gautam Buddha University | 2021 – 2023
Recipient of National Scholarship through Graduate Aptitude Test-Biotechnology (GAT-B).
- **B.Sc. (Science)** — Kurukshetra University | 2018 – 2021
Graduated with 91% Academic Honors.
- **National Rank & Honors: CSIR-UGC-NET Qualified + Junior Research Fellowship (JRF)**
Recognized for top national percentile in scientific analytical reasoning, quantitative logic, and advanced research aptitud
